Summary

Highly motivated programmer with a strong foundation in Computer Science and expertise in Node.js, SQL, Laravel, MongoDB, and more. Skilled in agile methodologies, problem-solving, and data structures, with a passion for learning and tackling complex tasks. Committed to making a positive impact through programming and eager to contribute to future projects.

Experience

09/2023 – 01/2024   **Trainee at Coding Academy by Orange**

Intensive course in Back-end Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)

- Managed databases with SQL skills.
- I completed 7 diverse projects, enriching my development experience and skills.
- Created custom websites by NodeJS, PostgreSQL and MongoDB skills.
- Developed and tested REST APIs to check API responds with wide variety of requests.

Projects

[Barakah Website](#)

I've worked as a Backend Developer on the Barakah website, an online platform committed to minimizing food waste by connecting food providers with surplus and leftover foods to recycling agencies and charities. We used modern web technologies and best practices for this project, I use in Backend: Node.JS(Express.JS) | PostgreSQL | Firebase | Stripe | Google Api | Trello [View Project Video](#)

[Furniture Ecommerce Website](#)

I've worked as a Backend Developer on the CraftVine website with team, an online platform for buying and selling furniture. The goal was to create a user-friendly and visually appealing shopping experience while ensuring security. We used modern web technologies and best practices for this project, We use in Backend: PHP (Laravel) | PostgreSQL | Google Api| Firebase | Trello [View Project Video](#)

[Books Reading Website](#)

A website dedicated to books, it is designed and developed to provide an interactive platform for book enthusiasts to discover, discuss, a search bar for easy book discovery, the application boasts a rich Book catalog Page, displaying detailed book information, and a User Profile Page for managing favorites and reading lists. We use: HTML5 | CSS3 | JavaScript (ES6+) | JSON | Firebase | Trello management | Team work | (UX/UI Design)
